Before 2023 VTТА used 'Standard Times' for race, but to make it easier to understand and compare results it is now preferred to use Age Adjustments (AAT). They're specific to age, gender, distance and machine type, and they're a set of times to be subtracted from your actual time.

VTТА have sets of time adjustments for men and for women, and for each gender there are versions for solo bikes, solo trikes, tandem bikes and tandem trikes.

A couple of examples of how Age Adjustments work might help:

- Rider A, a 45 year old man, is riding a 25. He rides an actual time of 58:55. His Age Adjustment for that distance is 55 seconds, so his Age Adjusted Time (AAT) is 58:00.
- Rider B, a 56 year old woman, is riding the same event. Her Age Adjustment is 10:00. She rides the course in 01:07:30, so her AAT is 57:30.

The adjustments applied to each ride compare them with the time predicted for a 40 year old male.
