### Notes to Competitors

No U turns near the start or finish. Any rider doing so will be disqualified.

This is a Mountain Time Trial, so please ensure bikes are fitted with adequate gearing and brakes.

There are several technical descents, which depending on the weather conditions may require care.

There are **two right hand turns** on the course. These occur at the 18.4mile and 19.9mile points. Help will be given by the marshals at this point, but the ultimate responsibility is that of the rider.

Although every effort will be made to ensure the smooth running of the traffic light controlled pedestrian crossing in Hayfield, riders must adhere to traffic regulations and be prepared to stop on both the outbound and return legs. **This is for rider safety and the future of the event, and any failure to comply WILL result in rider disqualification and possible further action.**

Take care upon entering the A6, as at this point it is a dual carriageway and a busy connecting road.

In accordance with CTT Regulation 20 and the rules of the road, all riders must negotiate traffic islands in a safe manner and be able to brake and stop if required. Therefore, do not approach them using tri-bars. Again, this is for rider safety, and therefore any failure to comply with it will result in rider disqualification and possible further action.

After completing the course, do not stop at the finish line or disrupt the time keeper.

For 2017, regulations state that all riders must personally sign out when returning their numbers after the event. Failure to do so will unfortunately result in their official result recorded as DNF.

**IN THE INTERESTS OF YOUR OWN SAFETY**

**Cycling Time Trials and the event promoters strongly advise you to wear a HARD SHELL HELMET that meets an internationally accepted safety standard. In accordance with Regulation 15 ALL JUNIOR competitors must wear Protective Hard Shell Helmets.**

**It is recommended that a working rear light, either flashing or constant, is fitted to the machine in a position visible to following road users and is active whilst the machine is in use.**
