For this event there is a fixed car park, & toilets, but still no snogging allowed behind the bike shed. Please abide by the Covid-19 Protocols. Toilets are one in one out, no tea & crumpets served by us, but there will be a "Barista" parked in the car park.

Please arrive at the event very close to your time slot and be dressed ready for riding. The start & finish this week is three miles apart, not only is this "added value", but an opportunity to recover your composure.

Your number will be placed on a table at the HQ, not at the Start, please check your number on the list below. Numbers will have been sanitised and no safety pins will be provided. If you need them please bring your own.

Race Protocol - You are asked to maintain social distancing. No gatherings in groups & turbo trainer warm up will only be allowed if this is done away from other competitors and out of view of the road. We are allowing 5 riders at a time at the start therefore please time your arrival at the start line a maximum of 4 minutes before your time, BUT REMEMBER YOU NEED TO PICK UP YOUR NUMBER AT THE HQ.

If you are under 18 you will need to bring a completed Parental Consent form. There will be no forms or pens available so if you do not have the correct paper work you will not be able to ride.

There will be no pusher-offer, you will have to do a standing start on your own (one foot on the ground). Rolling starts will not be permitted.

At the finish please shout your number for the finish timekeepers; they are rubbish at lip reading. Do not approach the finish timekeepers; they are not fed before the event.

Once you have finished your race you will be asked to return your number to a plastic box back at the HQ

IN THE INTERESTS OF YOUR OWN SAFETY, Cycling Time Trials and the event promoters require you to wear a HARD SHELL HELMET that meets an internationally accepted safety standard. It is also compulsory that a WORKING REAR LIGHT, either flashing or constant, is fitted to the machine in a position visible to following road users and is active while the machine is in use
