DRAFTING

If you should catch up another rider you should try to pass as quickly as possible and must not in any other circumstances ride close behind so that you take shelter from the wind. You must set your own pace and not use another rider as a pace maker. The onus on avoiding company riding shall be on the rider overtaken. Nor is it in order to ride alongside and even to ride a few metres behind for any appreciable distance. In the spirit of the sport, caught riders should not disturb the performance of the rider catching them by re-passing and/or riding closely behind them, except when they can sustain that move. This is generally considered to mean that the caught rider should allow a reasonable gap to develop of some 30 to 50 yards/metres.
